THE KINGDOM'S TRAINING MISSION

An Educational Programming Comic Book

Programming Concept: For Loop
Movie Theme: Baahubali-inspired Kingdom

Learn how a programming loop repeats instructions through a kingdom's military training mission.

THE COMIC STORY

Follow the four panels to understand how a for loop executes.

Panel 1: The Mission

Dialogue: The Kingdom's Army: Prepare for three rounds of training!

Explanation: The king gives the soldiers an instruction that must be repeated.

Code mapping: A repeated instruction represents a loop.

Panel 2: First Iteration

Dialogue: Narrator: The first iteration begins.

Explanation: The soldiers perform the training sequence for the first time.

Code mapping: One execution of the loop body is called an iteration.

Panel 3: Repeated Execution

Dialogue: Commander: The loop executes the instructions again!

Explanation: The soldiers repeat the same training instructions for the second and third rounds.

Code mapping: Each repetition is another iteration.

Panel 4: Mission Complete

Dialogue: Narrator: All three iterations are complete. The mission is finished!

Explanation: After the specified three iterations, the loop terminates.

Code mapping: A for loop stops when its specified range is exhausted.

WHAT DID WE LEARN?

For Loop: A loop repeats a block of instructions over a specified range or until its termination condition is reached.

Iteration: One execution of the loop body.

Program used:

```
for i in range(1, 4):
    print(i)
```

Output: 1, 2, 3
